### **Title**

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### **Information Disclosure Statement**

2. The Information disclosure Statements filed on 3/22/03 has been considered.

### **Claims Rejection Under 35 USC - 102**

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either **Bristol** (4,573,777) or **Shirayanagi** (6,056,401).

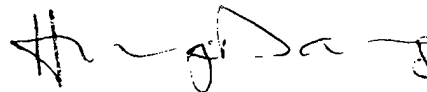

Both Bristol and Shirayanagi disclose aspheric spectacle lens blank to correct eyesight comprising: a front surface; and a back surface, wherein at least one of said front and back surface is aspherical, a framing reference point that is coincident with a pupil position of a user when the lens is installed on a frame is decentered from a geometrical center of an uncut circular lens.

Art Unit: 2873

It should be noted that although claims 6-8 are "method claims", the method steps consist of the broad steps of "attaching", "cutting" etc and therefore these steps would be inherently satisfied by the apparatus of the reference as modified.
